CURRICULUM VITAE

Khabir Roslan (b. 1995, Malaysia) is a trans-disciplinary artist whose practice explores the intersections of materiality, spirituality, ecology, and post-human thought. Working across painting, sculpture, installation, and site-responsive practices, he investigates themes of impermanence, interconnectedness, memory, and care through materials such as compost soil, gauze, raw jute and organic matter.

Khabir is a graduate of Universiti Teknologi MARA (UiTM), Shah Alam, with a Bachelor of Fine Arts, Khabir received the Most Promising Artist Award in the Emerging Artist category of the UOB Painting of the Year Malaysia 2020. His practice draws from Islamic philosophy, Nusantara cosmology, and post-humanism, exploring how processes of decay, healing, and regeneration reveal the entangled relationships between humans, non-human life. Through organic and trans-formative materials, his works challenge anthropocentric perspectives and propose a more relational understanding of being.

In 2021, he was selected as a Pelatih Tamu (Guest Trainee) for the Ilmu Program at Museum Gallery Tuanku Fauziah, Universiti Sains Malaysia (USM), where he developed site-specific works through engagements with traditional Malay architecture, cultural heritage, and tacit knowledge. In 2023, he participated in the WLG Incubator Programmed at Wei-Ling Gallery, further expanding his research into material transformation and ecological systems. He has also participated in artist residencies including the Sunyi Artist-in-Residence Programmed in Langkawi and the Inap Ilmu Residency, where he was mentored by Prof. Hasnul Jamal Saidon and Hasanul Isyraf Idris.

In 2025, Khabir presented his first solo exhibition, Sukma: Megah, Tundok, at Wei-Ling Gallery. The exhibition brought together a body of work centered on decomposition, repair, humility, and transformation through the use of compost soil and hand-stitched forms. Reflecting on the porous relationship between body, earth, and time, the exhibition positioned material change as both an ecological process and a spiritual condition, embodying the artist's ongoing investigation into interconnected modes of life.

KHABIR ROSLAN (B.1995)
